FALLSAVER® AT TRANSFORMING FALL PREVENTION CONFERENCE ON APRIL 21-25

Your Choice Living, Inc. will attend the Clearwater, Florida conference to demonstrate FallSaver® and the Medical Home® software technology

Chicago, Illinois, March 31, 2008 – Your Choice Living will be demonstrating the FallSaver® patient fall prevention solution at the April 21-25 Transforming Fall Prevention Practices Conference at the Hilton Clearwater Beach Resort, Clearwater, Florida. FallSaver® will exhibit at booth #10 in Salons F and G.

With the aging population and increasing focus on patient safety and quality, patient falls represent one of the most prevalent areas of concern in both hospital and extended care provider (ECP) settings. JCAHO has focused its “Goal 9” on fall prevention program requirements. CMS has made announcements in 2007 which indicate lower reimbursement for fall-related injuries that occur in hospitals, and has also issued new F-Tag requirements for ECPs. The FallSaver solution is proving a useful tool for staff efforts in meeting these increased requirements.

YCL has combined FallSaver®, the first device clinically-proven to reduce falls, with its Medical Home® software platform. This combination reduces patient falls and dramatically improves clinical staff productivity related to fall documentation and reporting. Rather than the cumbersome and costly process of paper form completion, filing, and reporting, the company’s software solution saves the hospital or ECP staff hours daily, and enhances staff ability to identify and address patient fall risks.

“Hospitals and ECPs are really working to generate productivity gains from information technology investments, and this is eroded every time a nurse or administrator spends time on avoidable fall incidents or in paper form documentation for fall reporting,” said Weatherly.

The 9th Annual Transforming Fall Prevention Practices Conference is co-provided by the Department of Veterans’ Affairs, and The University of South Florida.

About Your Choice Living

Your Choice Living, Inc. is a healthcare solutions firm that integrates patient data from monitoring devices and electronic medical records into a single portal system via its patent pending Medical Home® technology platform. Medical Home® solutions give customers a single system from which to manage the complexities of telemedicine services and support FallSaver®, one of the most comprehensive fall prevention products on the market today. With excellent devices from many companies now available to capture health data at the home or inpatient setting – Your Choice Living provides the glue to help integrate patient data from multiple sources. With its automated alerting and reporting system, Medical Home® keeps relevant information flowing between patients and care providers. For more information, visit www.ycliving.com.
